

EH&S Support

ASUS uses effective environmental health and safety management systems, best practices, and tools to minimize/eliminate adverse environmental impacts as well as health and safety risks for the programs we support. To achieve success, we implement innovative technologies, maintain effective pollution prevention programs, minimize the generation of waste, use resources responsibly (e.g., energy, water, fuel), and adopt processes that promote conservation. Programs and tasks are evaluated on a continual basis for leading and lagging indicators, driving the implementation of human or technology-based corrective or preventative actions to minimize the likelihood of a health/safety event and maximize prevention.

About Our Company

ASUS supports U.S. military installations across the nation with efficient water and wastewater management. Our work extends beyond the tap – from community involvement to infrastructure construction, we are committed to assisting our country's armed forces. We intimately understand the functions required to make an installation thrive, delivering unparalleled care and protection to those we serve. From community initiatives to infrastructure capital programs, we contribute to the well-being and growth of every base we serve while providing unparalleled environmental, health and safety program support. Contact us to see how we can support your ability to stand above the rest.

Environmental Health & Safety (EH&S)

Securing the Future Through Superior Regulatory Compliance Support

The ASUS Water and Wastewater Information Management System (AWWIMS) is a dynamic, relational web-based database that can be fully customized to the specific needs of the company. Key elements include:

- Environmental Program Compliance
- Health and Safety Management
- Expert Recordkeeping
- Innovative Tracking Tools
- Automated Status Notifications
- Intuitive Operation and Navigation
- Automated Reporting Tools
- Asset Compliance Management
- System Integration Ready

Safety Rodeos

Though our ASUS Safety Rodeos, we deliver effective, real-life, hands-on safety training. We tailor our training to the needs of our customers to maximize the impact and bolster their safety culture. This highly engaging training approach allows participants to focus on the critical aspects of training and actively participate in a manner that enhances understanding and learning. The training is designed to establish ownership within each employee, promote enthusiasm in learning about safety, and boost the overall morale of the team. Employees, managers, and supervisors often provide notably positive feedback, offering comments such as, *"this is the best safety training ever"*, *"I never knew safety training could be so fun"*, and *"I can't wait until the next training event."* Ask us how we can bring our impactful Safety Rodeos to you and your team.

Our Services

- **Fully Customized Compliance Databases**
 - Sometimes one size doesn't fit all! Ask us about customizing your regulatory program to fit your specific needs
- **Automated Monitoring and Reporting**
 - Continuous monitoring of permit compliance requirements and deadlines
 - Optimized and automated regulatory reporting
- **Compliance Audits**
 - Compliance program testing to ensure optimal coverage and essential compliance requirements are met and maintained
- **Innovative Solutions**
 - Creating, reviewing, and executing complex water and wastewater treatment solutions
 - Lead & Copper Rule (LCRR) solutions deployment and support to address EPA rule compliance, and most importantly keep your customers safe
- **Training**
 - Customized and effective training solutions with OSHA 30/10 and HAZWOPER certified instructors to meet your training goals
 - Cutting-edge virtual training environment to aid in the training and certifying of new and existing equipment operators

About Our EH&S Team

The ASUS EH&S Team is comprised of a diverse group of Environmental and Health & Safety (EH&S) professionals stationed around the nation with more than 100 years of combined experience in the EH&S field. Together we offer a wide range of technical backgrounds and disciplines to tackle the toughest challenges. Our team is comprised of an EH&S Manager, Environmental Program Administrators, Safety Program Administrators, and Water Quality Technicians ensuring a best in class support team. The ASUS EH&S Team is focused on complying with all applicable environmental laws, safety regulations, and other requirements. We strive for continual improvement by integrating sound environmental and safety practices into our daily decisions, functional duties, and operational processes.
